

- regulation of defense response
- inflammatory response
- immune complex clearance
- positive regulation of cell adhesion
- homotypic cell-cell adhesion
- myeloid leukocyte activation
- axoneme assembly
- taxis
- Immunoregulatory interactions between a Lymphoid ;
- defense response to virus
- GPCRs, non-odorant
- T cell mediated immunity
- negative regulation of defense response
- Adherens junctions interactions
- angiogenesis
- regulation of protein processing
- regulation of body fluid levels
- multicellular organismal homeostasis
- regulation of triglyceride metabolic process
- positive regulation of phagocytosis
