

- inflammatory response
- regulation of cell activation
- negative regulation of immune system process
- myeloid leukocyte activation
- Cytokine-cytokine receptor interaction
- positive regulation of response to external stimulus
- positive regulation of locomotion
- positive regulation of immune response
- regulation of cytokine production
- taxis
- second-messenger-mediated signaling
- natural killer cell activation
- regulation of neuron death
- positive regulation of cell death
- divalent inorganic cation homeostasis
- regulation of interleukin-1 beta production
- Natural killer cell mediated cytotoxicity
- inflammatory cell apoptotic process
- homotypic cell-cell adhesion
- Hemostasis
