

- regulation of intrinsic apoptotic signaling pathway
- regulation of leukocyte apoptotic process
- positive regulation of immune response
- regulation of multicellular organism growth
- JAK-STAT signaling pathway
- cell activation
- adaptive immune response
- leukocyte migration
- Transport of bile salts and organic acids, metal ions a
- cellular response to nutrient levels
- regulation of DNA binding
- regulation of actin filament-based process
- dendrite development
- regulation of cold-induced thermogenesis
