

- regulation of cell adhesion
- regulation of cytokine production
- regulation of defense response
- positive regulation of response to external stimulus
- lymphocyte activation involved in immune response
- leukocyte migration
- myeloid leukocyte activation
- second-messenger-mediated signaling
- natural killer cell activation
- interferon-gamma production
- Cytokine-cytokine receptor interaction
- Tyrobp causal network in microglia
- positive regulation of immune response
- regulation of neuron death
- T cell costimulation
- B cell activation
- cell-substrate adhesion
- divalent inorganic cation homeostasis
- vasculature development
- Cell adhesion molecules (CAMs)
