

- positive regulation of leukocyte cell-cell adhesion
- cell junction organization
- defense response to protozoan
- regulation of Ras protein signal transduction
- regulation of chemotaxis
- positive regulation of growth
- cell junction disassembly
- regulation of neuron projection development
- negative regulation of cell differentiation
- cardiac muscle tissue growth
- Extra-nuclear estrogen signaling
- Renal cell carcinoma
- regulation of postsynaptic specialization assembly
- positive regulation of T cell receptor signaling pathwa
- cell migration involved in sprouting angiogenesis
- positive regulation of kinase activity
- Glioma
- negative regulation of cytokine production
- photoreceptor cell differentiation
- regulation of postsynaptic neurotransmitter receptor i
