

- regulation of muscle tissue development
- Focal adhesion
- Colorectal cancer
- regulation of cell adhesion
- regulation of dendrite morphogenesis
- response to nutrient levels
- regulation of actin filament organization
- negative regulation of cell differentiation
- Id signaling pathway
- cell activation
- regulation of cellular carbohydrate catabolic process
- transforming growth factor beta receptor signaling pa
- regulation of angiogenesis
- negative regulation of growth
- monocarboxylic acid transport
- negative regulation of anoikis
- positive regulation of smooth muscle cell migration
- Spinal cord injury
- protein phosphorylation
- brown fat cell differentiation
