

- regulation of microvillus assembly
- Formyl peptide receptors bind formyl peptides and m:
- positive regulation of integrin activation
- regulation of protein processing
- inflammatory response
- plasma membrane bounded cell projection assembly
- epithelial cilium movement involved in extracellular fl
- Staphylococcus aureus infection
- positive regulation of cell adhesion
- regulation of acute inflammatory response
- neutrophil homeostasis
- cell maturation
- positive regulation of natural killer cell mediated cytot
- calcium-dependent cell-cell adhesion via plasma me
