

- SRP-dependent cotranslational protein targeting to m
- Parvulin-associated pre-rRNP complex
- cytoplasmic translation
- regulation of cell adhesion
- positive regulation of smooth muscle cell migration
- actin cytoskeleton organization
- positive regulation of antigen receptor-mediated sign.
- response to cold
- negative regulation of cell adhesion
- lung epithelial cell differentiation
- actomyosin structure organization
- Focal adhesion
- regulation of anoikis
- cell-substrate junction assembly
- muscle structure development
- Repression of WNT target genes
- regulation of ATPase activity
- positive regulation of hydrolase activity
- intrinsic apoptotic signaling pathway
- regulation of leukocyte apoptotic process
